

# Geography Learning Journey

Understand climate zones, biomes and vegetation belts.

Describe how locations around the world are changing

Create maps of locations identifying patterns

Know the population, climate and economics of North America

Know some major trade links and routes

Know the basic needs and additional needs of humans

Know what the symbols and key are on an OS map and how to use them

YEAR 6

Describe how countries and geographical regions are interconnected and interdependent

Know and use statistics and graphs to compare the population

Know and locate North America and other countries near by

Know where certain food comes from and why it needs to be imported/exported

Use four and six-figure grid references

Compare average rainfall and sunlight

Know that maps have different purposes

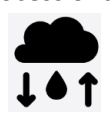

Compare countries based on geographical diversity

YEAR 5

Explain what causes earthquakes and how they are measured.

Know the fluvial process

Know the process of the water cycle

Analyse which maps are the most effective and why

Know the key human and physical features of Greece

Know at least one country from each continent

Explain how volcanoes are formed

Compare time zones of some countries

Know which European countries Vikings came from

YEAR 4

Mark some of the significant Viking settlements on a map

Know how countries in the Northern and Southern hemisphere differ

Know where the Vikings settled in the UK

Use an eight point compass to locate some key places in the UK on a map

Know what a coastal country is

Using a country in Europe – identify key human and physical features

Know the human and physical features of the rainforest and compare these to the UK.

Know the eight points of a compass

YEAR 3

Create a map using a grid reference and a key of the key physical and human features

Locate the countries of Europe

Know where the Equator, Southern and Northern hemisphere are located

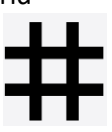

Use a basic map of the UK to locate where the beach and coast is

Know where the rainforests are located and the climate of the rainforest

Know what a grid reference is

Compare Kenya's climate to the UK's climate

Know some key human and physical features of Kenya

Compare the weather of Kenya and the UK

YEAR 2

Know some physical and human features of Lincoln

Create a simple map with a simple key

Know the weather of the seasons

Know the four capital cities of the UK.

Know the weather of a non-European country

Use positional and directional language

Know some features of continents

Know the names of the five oceans

Know the names of the seven continents

YEAR 1

welcome
